Description

Presvac's ultra-freezer line is designed for the storage and rapid freezing of plasma units for blood banks, providing the highest level of protection for stored products.

- **Refrigeration system composed of two cascade compressors**
- **Stainless steel inner chamber mounted on wheels with a braking system for easy mobility**
- **Digital thermometer with programmable temperature and alarm system for cooling failures**
- **Washable air filter with easy maintenance**
- **Capacity: 360 liters**
- **Internal doors with safety lock**

Optional Accessories:

- Temperature chart recorder (7 days)
- Remote alarms
- Power failure and door open alarms
- **Wi-Fi Data Logger with Cloud Monitoring:**

Real-time temperature recording and visualization from anywhere, with data storage, reporting, and automatic alarms.
